Objective

As a motivated and detail-oriented software engineering fresher, I seek a dynamic and challenging role where I can apply my technical skills and contribute to innovative solutions. Eager to learn and grow within a collaborative team environment, I aim to leverage my programming knowledge to contribute effectively to the success of the organization.

Projects

- **DocBooker** :- <https://doc-booker-front-end.vercel.app>

Developed a full-stack Doctor Booking Application leveraging the MERN stack (MongoDB, Express.js, React.js, Node.js) to streamline the process of booking medical appointments. This application provides an intuitive interface for patients to find and book appointments with doctors, and a robust backend for managing schedules and user data.

- **CarreerHub** :- <https://career-hub-front-end.vercel.app>

Developed a dynamic and user-friendly Job Seeker Application using MERN stack (MongoDB, Express.js, React.js, Node.js) aimed at streamlining the job search process for users. This full-stack application leverages the power of modern web technologies to provide an intuitive interface and robust backend services. Key features of the application include.
